

Vienna, March 2026

Dear potential customers,

Thank you for showing interest in my SAMBUCO tonearm concept.

**SAMBUCO Pricelist:** All prices in EUR including Austrian VAT. (March 2026)

<b>2350.-</b>	<b>The SAMBUCO tonearm:</b> Tonearm, cartridge interface, tonearm base, screw set, wiring to a male 5 pole DIN connector, mounting template, azimuth template, transport and assembly box, instructions. (Both, in English and German downloadable as pdf)  The following tonearm cable to your Preamplifier is your choice and expense. (The necessary SAMBUCO connection has to be a DIN female 5 pin, diameter: 12 mm)
<b>40.-</b>	For an additional “cartridge <b>interface</b> ”
<b>0.-</b>	Dispatchment cost for deliveries within the EU are included. Other countries will have additional cost for delivery and potentially customs duty.

After receiving your payment, your SAMBUCO will be dispatched in a discrete protective box, without any brand names on it. Please keep the box and the foam inserts for any future transport. The written instructions should cover all aspects of installation and usage. Most customers have already seen the short instructional videos on the SAMBUCO homepage ([www.sambuco.net](http://www.sambuco.net)). If there are questions exceeding my instructions, I am happy to be of “remote” support. Send me an email, and/or we shall have a WhatsApp telephone conversation about your questions. All very simple within the European Union: No roaming, no customs duty. If you are outside the EU, I need to find out, how delivery will work, and at what price. If and how much customs duty becomes payable is an open question in times of “trade wars”.

If you like my offer, send me an email to [info@sambuco.net](mailto:info@sambuco.net). I will ask you a few questions about your turntable brand and the height difference between your platter and the tonearm base? (Recommended minimum: 30 mm) Which effective tonearm length do you prefer: 240 mm (10”), or 300 mm (12”)?

Refund policy: Listening tests in your personal environment are very important. My experience is, that if you enjoy listening to your records without fatigue, but with an appetite to listen even longer, although it is already past midnight, then you are happy. If you are not, and decide within 4 weeks that you want to return the SAMBUCO to me, no problem. I will repay your purchase price less the cost of transport handling and customs duties (if any), once the tonearm is back at my place, without any damages. Please use the original protection packaging for transport.

Best regards from Vienna, Austria.

Lukas Julinek
